PROFESSIONAL SUMMARY

Recent B.Tech Computer Science graduate (GITAM University, 2025) with hands-on experience in backend and full-stack development using Java, Spring Boot, and Jakarta EE. Skilled in building RESTful APIs, JPA/Hibernate ORM, and MySQL database design. Built production-grade projects, including an e-commerce REST API and a full-stack food delivery platform with secure authentication. Seeking an entry-level software development role to apply my skills and deliver impactful solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, HTML, CSS, JavaScript	Frameworks & Libraries Spring Boot, Spring Boot Actuator, Spring Data JPA, Hibernate, JEE Servlets, JSP, TensorFlow, CNN	Databases MySQL, JDBC
Tools Git, Maven, Docker, Apache Tomcat, Raspberry Pi, IoT Sensors	Design & UX Google UX Design principles, Figma (basic)	Design Patterns MVC, DAO, DTO, Repository Pattern, Dependency Injection

INTERNSHIP / PROJECTS

E-COMMERCE USEING REST API <i>Internhsip, Tap Accademy. Bengaluru</i> Spring Boot Spring Data JPA MySQL Hibernate Maven - Developed RESTful backend for e-commerce platform with shopping cart, order management, and product catalogue using Spring Boot and layered MVC architecture. - Implemented transactional cart operations with automatic duplicate prevention using custom JPA repository methods and @Transactional annotation for atomicity. - Designed bidirectional JPA relationships (OneToMany, ManyToOne) with cascade operations and orphanRemoval for Order-OrderItem entities, ensuring data consistency. - Applied the DTO pattern to decouple API responses from database entities, improving security and preventing over-fetching of data. - Used Stream API for functional transformations and BigDecimal for financial precision. - GitHub: github.com/SHREENIDHIMS/E-Com	02/2026 – Present
ONLYFOODS - FOOD DELIVERY WEB APPLICATION <i>Internhsip, Tap Accademy. Bengaluru</i> Jakarta EE Servlets JSP MySQL JDBC BCrypt - Built a full-stack food delivery platform mimicking Swiggy functionality with user authentication, restaurant browsing, shopping cart, and complete checkout flow. - Implemented BCrypt password hashing and session-based authentication with saved address management for repeat orders. - Designed DAO pattern with JDBC for database operations, managing relational data across users, restaurants, menu items, cart, and orders tables. - Created responsive UI with dark/light theme toggle and Google Fonts integration. - Developed complete order workflow: browse → add to cart → select address → confirm - GitHub: github.com/SHREENIDHIMS/OnlyFoods	12/2025 – 2026
Smart AgriBot - AI-Based Crop Disease Detection <i>Academic Project, GITAM University, Bengaluru</i> - Built a real-time crop disease detection system using CNN and Computer Vision with 90%+ classification accuracy. - Developed a web interface enabling farmers to upload images and receive instant disease diagnosis results. - Integrated Raspberry Pi and IoT sensors with TensorFlow and OpenCV for live monitoring and model training. - Trained model on a large multi-season dataset with cloud-based backend, improving accuracy across crop varieties. - Solution reduced pesticide usage by enabling early detection and targeted treatment recommendations.	09/2024 – 2025

VOLUNTEER EXPERIENCE

Community Volunteer <i>Aikyam</i> - Participated in road-cleaning and garbage collection drives, contributing to community hygiene. - Raised awareness about environmental responsibility through outreach campaigns. - Assisted in organizing community programs, developing leadership and coordination skills.	2021 – Present Mysuru, Karnataka
